AVERTX CONNECT

Cloud Connected Architecture

LOCAL
Video is recorded locally for increased performance and privacy

CLOUD
User accounts and video clips are stored in the cloud for fast and convenient remote access

REMOTE
Video is accessed remotely using powerful remote applications

Local Recording
Recording video locally allows you to use higher camera counts and store video for more days.

Simplified Management
AvertX Connect simplifies user management and permissions by moving it to the cloud. Connect to all your devices using only an email address and password.

Easy Remote Connection
ProConnect automatically establishes a secure connection using your email address and password, eliminating complicated port forwarding or static IPs.

Remote Access
Connect to your system from anywhere with Multi-Browser Web Client, Mobile Apps and Apple TV.

Local Viewing
Video can be accessed over the Local Network for improved security and performance.

Video Export & Sharing
Export video clips to the cloud, then share with family, coworkers, or law enforcement via email using a password protected link.

Cyber Secure
Remote access is always initiated via a trusted outbound connection and does not require opening inbound ports on the local firewall.

Remote Alerts
Receive instant notification of motion or alarm events from the cloud on your mobile device or PC.
